DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to an oxynitride deposition method, classified in class 427, subclass 255.4.
- II. Claims 4-7, 13-17, 21-25, and 28-31, drawn to a film deposition apparatus, classified in class 118, subclass 715.
- III. Claims 8-12, drawn to a silicon dioxide forming method with water formation, classified in class 427, subclass 255.31.
- IV. Claims 18-20, drawn to a silicon nitride deposition method, classified in class 427, subclass 255.394.
- V. Claims 26-27, drawn to a silicon oxide deposition method with dinitrogen oxide gas, classified in class 427, subclass 255.37.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, III, IV, and V and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be used to deposit materials other than oxynitrides or silicon dioxide.

Art Unit: 1762

Inventions I, III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation in that they deposit different films using different reaction gases.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Makuch on 30 January 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy H. Meeks whose telephone number is (703) 308-3816. The examiner can normally be reached on Mon, Tue, and Thu, 6:00-6:30, and Sun, 6-10 am.
